

## **Meeting Notes 12/1/2018**

- Discussed priorities for project - finishing user register and login pages, connecting to database
- Set up file for local database creation, with testing data included
- Started work on user login/register page and home page design
- Modified and debugged code for taking user input from the webpage and adding it to the database
- Completing code for image uploading, includes input but little functionality for tagging
- Discussed goals for the rest of the weekend, and meeting on tuesday
- Discussed concepts for picture display
