	What have you completed?	What will you complete for next Meeting?	Obstacles/Roadblocks
Dylan Bossie	Managed to get anaconda interacting with postgres Messing around with doing database stuff in python	Start interacting with our actual database, not just the test one	Busy schedule, time management
Sang-Joon Song		Code for taking I/O for user login information to send to backend people	
Drew Turner			
Andrea Martorano	More database research on SQL Figuring out how we want the database to be structured What's the most efficient	Create user information postgres database on Heroku Researching Heroku image upload/download	Unsure about the database structure Userinfo database Picture database Create tag database? Figure out tagging logistics
Mikayla Pickett	Research on HTMl to Python	Translate Jay's design for user login into HTML/CSS	Need info from frontend side and python side
John Mulligan	Sketched out login UI in Sketch	Design user login page, and photo upload page	Still sick Not fully understanding how to use Sketch
